

A letter from a Saginaw, Michigan autoworker

7 April 1998

It is very encouraging to me that there is a media for communication that will surpass the limits and difficulties of distributing a newspaper. I really believe that the truth is now available and people are looking for this and that the working class will come into the fold and make the Socialist Equality Party much stronger.

I would like to thank all the brains in the SEP for making this information available to the working class. I know that the working class is intelligent and using computers and looking for the truth and will find it on the *World Socialist Web Site*. It is very encouraging to me that this is finally happening.

LR

Autoworker
