

Dr. Anthony Leonardi discusses the Omicron variant and the COVID-19 pandemic

Evan Blake, Benjamin Mateus

13 December 2021

In this video interview, immunologist Dr. Anthony Leonardi speaks with *World Socialist Web Site* writers Evan Blake and Benjamin Mateus about the Omicron variant and the COVID-19 pandemic. Dr. Leonardi has written scientific articles on the topic of Long COVID and has continuously raised the alarm about the dangers of COVID-19, warning against all efforts to downplay the severity of the disease. For more information and explanations of some of the scientific topics discussed in the video, read this two-part interview that Dr. Leonardi did last month with Benjamin Mateus.
